

A close-up, low-angle shot of a modern wooden bench. The bench is constructed from many thin, horizontal wooden slats that are curved to create a smooth, flowing, and layered appearance. The wood has a warm, natural grain. The bench is positioned on a light-colored, textured surface, possibly concrete or stone. The lighting is soft and even, highlighting the texture of the wood and the curve of the slats.

GOOD 𐄂 WOOD

Design Portfolio 2024

Founded in 2014, GoodWood is a New Orleans based design and build firm specializing in custom furniture and architectural fabrication. The skillful team of artisans construct distinctive pieces and spaces for concepts around the nation. GoodWood showcases a project's personality through unique, timeless pieces consciously designed with functionality and ergonomics.

As a fully licensed and insured specialty contractor, we are able to offer a wide range of custom residential and commercial services to our clients.

GoodWood specializes in services in the following areas:

- Commercial
- Residential
- Design + Consultation
- CNC

Commercial

The GoodWood team predominantly completes commercial architectural fabrication projects. We have worked with a wide variety of commercial clients, but the majority of our projects have been for:

- Restaurants, Bars & Coffee Shops
- Retail Stores
- Salons
- Corporate Offices
- Hotels

We take a human-centered approach to custom architectural fabrication. Every proposal we offer is customized. We work with our clients to showcase a project's uniqueness through functional pieces that are sustainably built.

Residential

New Orleans is our home, and we are committed to bettering our community. GoodWood hires local, skilled workers and purchases over 80% of all materials and consumables from local vendors.

The majority of the residential work GoodWood completes is for New Orleans residents. We appreciate the opportunity to work on custom residential projects because it is a chance to create timeless pieces that showcase a client's personality for their home.

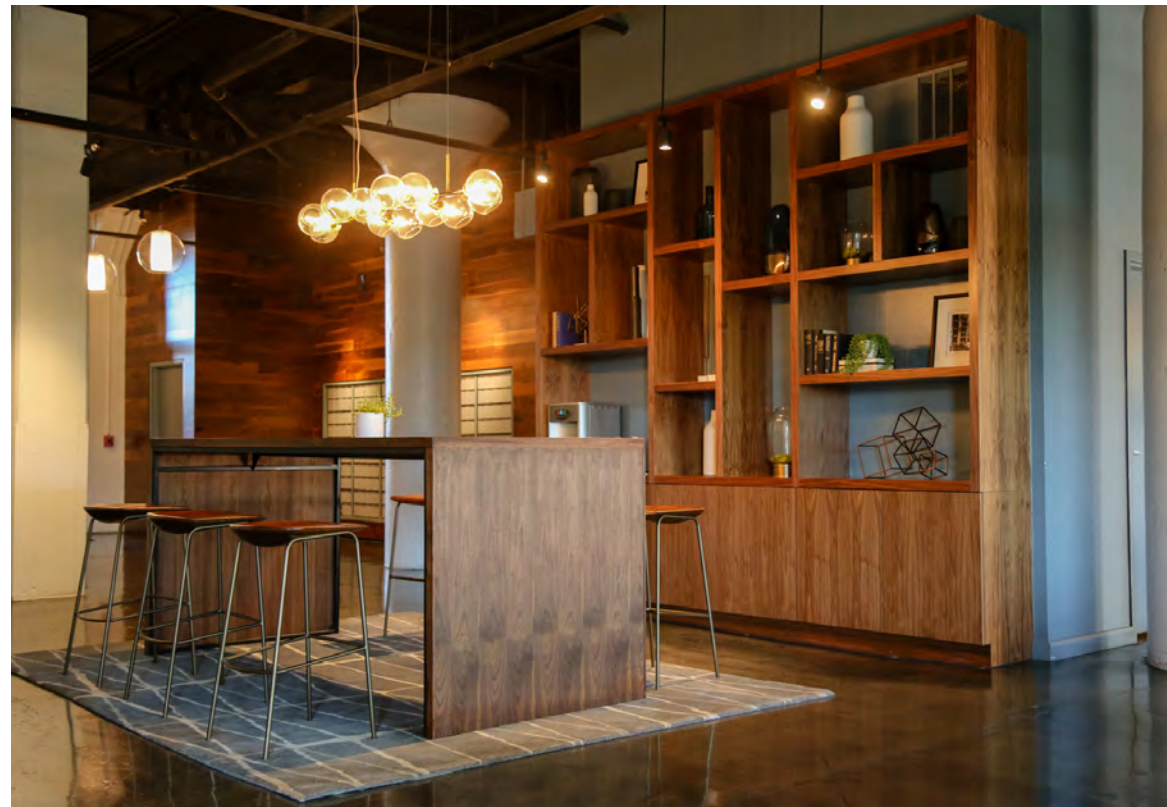

GoodWood's mission is to sustainably create beautiful pieces and timeless designs that inspire our communities. To us, sustainability means going beyond being environmentally conscious and includes connecting with the community, using and reusing materials that can be replenished naturally, and building a business that bolsters the local economy.

Woodworking

The GoodWood team creates functional, artistic furniture in any medium, but as our name suggests, many of our designs have some element of woodworking incorporated into the project.

Metalworking

Metalworking and welding are an integral aspect of many GoodWood designs, whether it is a base for a custom desk or a structure made entirely of metal. Our welders specialize in the use of brass, aluminum, steel and stainless steel.

Other Mediums

Our team is well versed in a wide variety of materials, including wood, concrete, metal, plaster, acrylic and LED lighting. In addition, GoodWood is able to create a variety of outdoor signage and has relationships with other local makers to offer additional services, such as upholstery and stonework.

CNC

Our team is pleased to now offer a variety of in-house CNC services to our clients.

What is a CNC Machine?

CNC stands for Computer Numerical Control. These machines use a manufacturing process that operates automated, high-speed cutting tools to form low-cost, precision parts out of plastics, metals, aluminum, wood and many other hard materials.

Additional Work

Our greatest success is our people, and our team is the cornerstone of GoodWood. With an acute attention to detail, quality, communication and collaboration, the GoodWood team works together to bring projects from concept to completion. We commit ourselves to producing high quality pieces that are thoughtfully designed and long lasting. In addition, we are proud to be a New Orleans family-owned and operated business.

We'd love to discuss what we can do for you and how we can work together.

GoodWood operates from a 16,000 square foot facility in Mid City and currently employs a team of 9 skillful artisans.
